Brazil

I am a Brazilian-Japanese graphic designer and I have been working in the creative sector since 1996. I started my career as an intern at my father's printing company.

After this hands-on experience, I decided to move into the video and cinema sector, where I have been creating most of my projects.

Dealing with highly skilled professionals from both the television and film industries, has added to my knowledge and expertise that has been developed over the last 20 years.

It has taught me about being committed to the company, to the team and to my work, which is crucial in finding the best results - especially when coordinating a group of individuals to deliver great creative content.
